

ShotByShot Round up

stories of vaccine preventable diseases
Summer | 2019

New meningitis stories

ShotByShot debuted two original California-based meningitis b stories this year, produced by the ShotByShot team. If you haven't seen them yet, check them out. [Scotty's Story](#) featuring Scotty's mom describing the day she lost her 18 year old son to a disease (meningitis B) she'd never heard of and her wish to spare other families her grief.

In [Dash's Story](#), 1 week before leaving for college at Chico State, Dash ends up in the hospital with his life in the balance. His mom talks about what it was like to see her son so ill and offers her message about meningitis B prevention, also available in [written](#) format.
